Games: 12/22 - 01/04/2026

Date	Opponent	Opp Rank	Win Prob	Exp. Upside	Exp. Downside
2025-12-28	Hamline	#168	63.2%	1.9%	-5.1%
Leverage: 22.6% NPI Swing: +1.41					
2025-12-31	Caltech	#353	99.5%	0.3%	-0.3%

2026-01-03	Caltech	#353	97.4%	0.1%	-0.2%
Leverage: 15.9% NPI Swing: +1.37					

Opp Rank: NPI Rank of opponent.

Win Prob: Your team's win probability based solely off current efficiency scores and home court advantage.

Exp. Upside: A combination of how much your NCAA Tournament odds change if you win and how likely you are to win.

Exp. Downside: A combination of how much your NCAA Tournament odds change if you lose and how likely you are to lose.

Leverage: The difference in NCAA Tournament odds between a win and a loss.

NPI Swing: The difference in average final NPI value between winning and losing this game (signed value: positive means winning improves NPI).

For teams who make the NCAA Tournament in 100% of simulations, technically no game has any "leverage" or "NPI swing" since we don't have a batch of wins and a separate batch of losses to compare.

NPI Minimum Wins Threshold Impact Tracker

The NPI formula wants to allow teams to not count a win if it hurts your NPI (a win over a weak team might get you a fairly low single game NPI score). However, a team has to have 15 wins (errr, 16!) before they are eligible to potentially drop a low-counting win.

This Minimum Wins Threshold is named fairly poorly. It is NOT the minimum number of wins to be postseason eligible.

Current Wins: 8 / 15

Remaining Schedule:

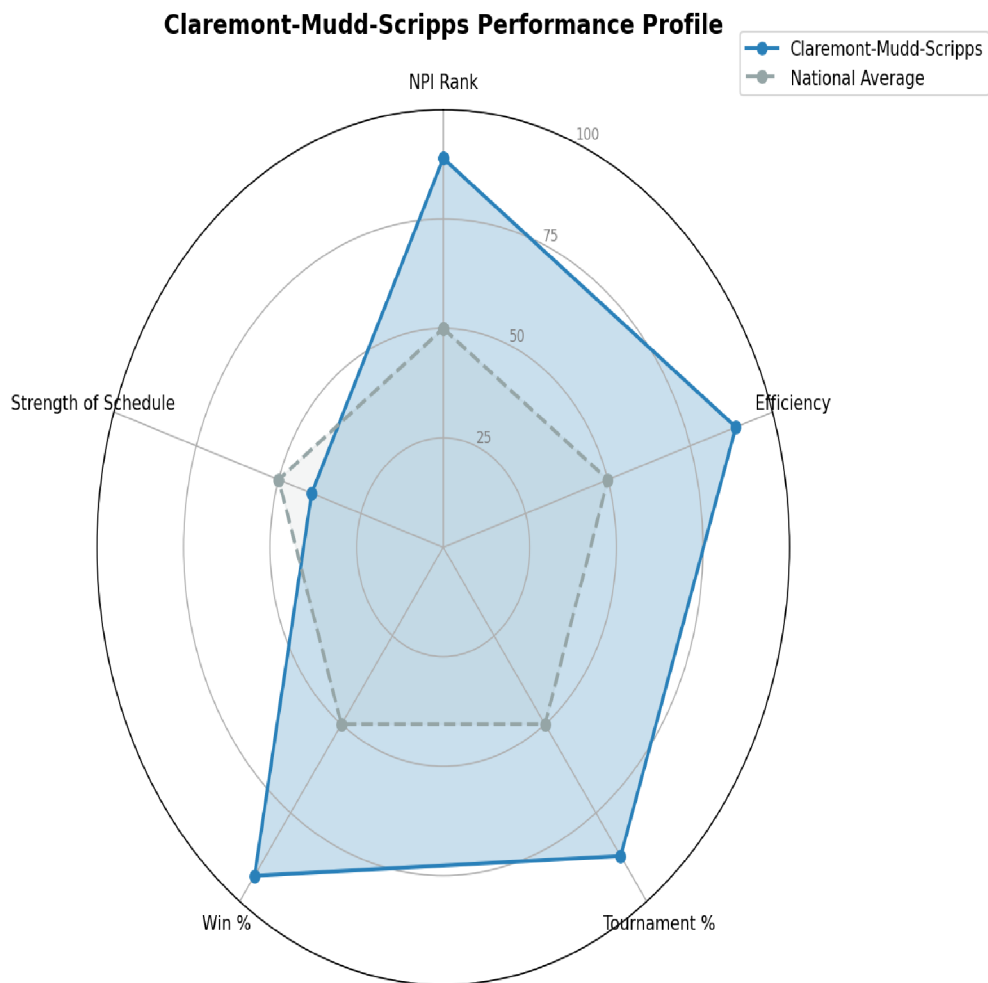

- **16 games** remaining
- 2 vs Top-50 teams
- 5 vs Top-100 teams
- 9 vs Other teams

Based on simulations:

- Median finish: **21 wins** (well above threshold)
- **80%** chance to reach 15 wins

At-Large %: Percent of sims where the team gets an at-large (Pool C) bid.

ALWYNI: At Large when you need it, % of sims where the team doesn't win their conference tournament and gets an at-large bid. This is more useful than At Large %, since we really only care about the number of times you got an at-large when you were ELIGIBLE for one. If you won your conference tournament then the sims never even check if you would've gotten an at-large bid.

Simulations are NOT predictions. *These simulations help provide an idea of the median of the range of outcomes for your team, based on (a) their current Efficiency Margin, (b) the rest of their schedule (and THOSE team's current Efficiency Margin).*

The displayed data from these Simulations often reflects the median of a range of outcomes. In reality, once a team plays a game that wide range of potential outcomes over 1,000 simulations becomes set in stone as a Win or a Loss.

Simulations are no replacement for playing the games. They are merely a way to illustrate the possible range of outcomes for a team, using all currently known data.

Simulated Loss Totals and Their Outcomes

When this team did **NOT** win their conference tournament auto-bid, how often did they receive an at-large bid based on their final loss total?

Current Loss Total: 1

Losses	Sims w/o Auto Bid	Got At-Large	At-Large Rate
1 ← You are here	—	—	<i>not observed in sims</i>
2	104	104	100.0%
3	543	543	100.0%

10	61	0	0.0%
11	18	0	0.0%
12	1	0	0.0%
13	—	—	<i>not observed in sims</i>

Note: Since this data excludes simulations where the team won their conference tournament auto-bid, **every row shown includes at least one loss in the conference tournament.** Teams needing an at-large bid must have lost in their conference tournament.

SCIAC NCAA Tournament Bids Chances

Based on 10,000 season simulations, here's the probability of how many SCIAC teams make the NCAA Tournament:

Teams	Chance	Distribution
1 team	30.4%	<div></div>
2 teams	52.7%	<div></div>
3 teams	16.9%	<div></div>
4 teams	0.0%	

Each conference gets 1 automatic bid (conference tournament champion). Additional bids are at-large selections based on NPI ranking.
