This Week: 11/02 - 11/15/2026

Your Games

Date	Opponent	Opp Rank	Win Prob	Exp. Upside	Exp. Downside	Leverage	NPI Swing
2026-11-11	Skidmore	#191	56.7%	3.2%	-4.4%	18.7%	+1.06
2026-11-14	SUNY Geneseo	#88	70.3%	2.7%	-5.9%	18.8%	+1.13
2026-11-14	Roger Williams	#208	84.2%	1.5%	-4.6%	20.6%	+1.15
2026-11-15	William Paterson (#27)	#38	76.0%	4.4%	-5.6%	22.9%	+1.27

Opp Rank is NPI rank. Upside, downside, leverage, and NPI swing are defined on the last page. Teams at 100% tournament odds show no leverage because no simulated loss exists to compare against.

Games That Move Your Strength of Schedule

Games in the next 7 days involving your conference opponents or past non-conference opponents. Your past opponents winning big games is the second largest input to your NPI, after your own results. Sorted by Potential Win NPI, the single-game NPI the team earns if it wins.

No conference or past non-conference opponents play in the next 7 days.

Rooting Guide

*Games this week where other teams' losses help you most. Your ALWYNI: **54.9%**. Teams with an ALWYNI close to yours are your direct bubble competitors.*

Minimum wins threshold: 0 of 15, reached in 65% of simulations. Once a team reaches 15 wins, the NPI formula drops any win that lowers its NPI. Below 15, every win counts. This is not a postseason eligibility rule.

Season Simulations

10,000 simulated seasons from current efficiency margins

Metric	Value	What it means
NCAA Tournament		
Tournament %	**59.2%**	Share of 10,000 simulations where the team makes the NCAA Tournament.
Auto Bid %	**9.6%**	Wins the conference tournament.
At Large %	**49.6%**	Receives an at-large bid.
ALWYNI	**54.9%**	At Large When You Need It: share of sims where the team loses in its conference tournament and still gets an at-large bid. The number that matters for a bubble team.
QF %	**47.6%**	At-large rate after a conference quarterfinal loss.
Semifinal %	**56.9%**	At-large rate after a conference semifinal loss.
Final %	**67.0%**	At-large rate after a conference final loss.
Seeding		
Top 4 %	**0.2%**	Finishes in the top 4 of NPI (hosts through the Elite 8).
Top 8 %	**1.2%**	Finishes in the top 8 of NPI.
Top 16 %	**8.8%**	Finishes in the top 16 of NPI (hosts the opening weekend).
Season Outlook		
Median Record	**18-8**	Median wins-losses across sims.
Median NPI	**58.148**	Median final NPI value across sims.
NPI Range	**48.529 to 66.261**	Lowest and highest final NPI seen across sims.

Simulations are not predictions. They show the range of outcomes given each team's current efficiency margin and remaining schedule. Once a game is played, that branch of outcomes collapses to a win or a loss.

Loss Totals and At-Large Outcomes

sims without an auto bid

When this team did not win its conference tournament, how often did it receive an at-large bid at each final loss total?

Current loss total: 0 (no simulation without an auto bid ended on this total)

Losses	Sims w/o Auto Bid	Got At-Large	At-Large Rate
3	22	22	**100.0%**
4	86	86	**100.0%**

17	4	0	**0.0%**
18	1	0	**0.0%**
19	1	0	**0.0%**

Simulations where the team won its conference tournament are excluded, so every row includes at least one conference tournament loss.

NESCAC NCAA Tournament Bids Chances

Based on 10,000 season simulations, here's the probability of how many NESCAC teams make the NCAA Tournament:

Teams	Chance	Distribution
1 team	5.7%	
2 teams	26.9%	
3 teams	36.8%	
4 teams	23.2%	
5 teams	6.5%	
6 teams	0.9%	
7 teams	0.0%	

Each conference gets 1 automatic bid (conference tournament champion). Additional bids are at-large selections based on NPI ranking.

Definitions

Team Overview

Record: Current year Win-Loss record vs. D3 opponents.

NPI: NCAA Power Index (NPI) value.

Efficiency: Per possession measure of a team's points scored and points allowed.

Tempo: Possessions per 40 minutes.

Height: Minutes weighted height in inches.

Rotation Size: Number of players who have played 6% of the team's minutes.

Returning: Percent of prior year scoring that returns to the roster.

Experience: Minutes played weighted class year of the team.

New Player Pts/30: The total Points/30min among players who are (a) new to the roster, (b) playing at least 6% of the team's minutes.

Tournament Status:

- AUTO BID — Projected conference champion
- AT-LARGE — Projected at-large selection
- OUT — Not currently projected for NCAA Tournament

Your Games

Opp Rank: NPI Rank of opponent.

Win Prob: Your team's win probability based solely off current efficiency scores and home court advantage.

Exp. Upside: A combination of how much your NCAA Tournament odds change if you win and how likely you are to win.

Exp. Downside: A combination of how much your NCAA Tournament odds change if you lose and how likely you are to lose.

Leverage: The difference in NCAA Tournament odds between a win and a loss.

NPI Swing: The difference in average final NPI value between winning and losing this game (signed value: positive means winning improves NPI).

Rooting Guide

Root For: The team you want to win this game.

To Beat: The team whose loss would help your NCAA Tournament chances.

ALWYNI%: At Large When You Need It - % chance of getting an at-large bid when not winning conference tournament.

Win Prob: Probability that the "Root For" team wins this game.
